Office Action Summary	Application No. 10/823,338	Applicant(s) HUANG ET AL.	
	Examiner Allen T. Cao	Art Unit 2627	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-17 are objected to because of the following informalities:

The phrase "for a disk drive" should be inserted after the term —absorber—in claim 1, line 1; claim 6, line 1; and in claim 12, line 1.

Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 4-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Huang et al (US. 2004/0202099).

Huang et al, figures 2B and 4B, discloses a shock absorber for absorbing shock energy generated by a vibrator positioned on a connecting plate, the shock absorber having a column having an upper damper, a neck zone coupled with the connecting plate, a lower damper and a through hole located in the center of the column; a support plate; a cover plate and a cylinder all as set forth in claim 1. Huang et al also discloses the neck zone (figure 4B) has at least one groove 126 to reduce a contacting area between the neck zone and the connecting plate so as to reduce a horizontal vibration frequency of the column in a horizontal direction as recited in claim 1.

Regarding claim 4, Huang et al discloses that the connecting plate is a base of a disk drive and the vibrator is a rotary device of the disk drive.

Regarding claim 5, Huang et al discloses that the connecting plate is a primary suspension plate.

4. Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 6-17 are allowed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen T. Cao whose telephone number is (571) 272-7569. The examiner can normally be reached on Mon - Thurs (7:30 - 6:00).
